Let's Start!

Help! My computer has a virus!

Learning Outcome

Identify and describe rules and obligations through a wider range of language and expressions in both work and social contexts.

Can Do Statements

- I can talk about rules and regulations.
- I can talk about crime and punishment.
- I can talk about things I had done or things that had happened.

Ask your partner:

- What does the word "virus" mean to you?
- Are you good at using computers? Why or why not?

Let's Explore!

Have you ever had a computer virus? Have you ever heard of someone being **put on trial*** for creating a virus?

* To be "put on trial" means to appear in court to answer for a crime you are suspected of committing.

Instructions: Read the text aloud.

Computer Viruses

A computer virus is a computer program that invades a computer and often causes unwanted or undesirable things to happen. Different viruses enter and infect computers in different ways, with each successive generation getting smarter and harder to detect and destroy. Computer viruses can do terrible damage. They can erase all the files that people have saved on a hard drive, make files useless by changing them, and even hijack your computer so it can be used for illegal purposes.

Computer viruses are considered to be one of the major problems of our century. They cause billions of dollars in damage and lost revenue annually in the US alone and this figure is expected to rise in the future. One survey found viruses roaming the Internet had infected 98% of North American businesses. Most of these businesses are linked to the Internet, which makes it even easier to spread the viruses.

The US government takes computer virus crimes very seriously. Suspects accused of computer crimes are investigated and put on trial according to the Computer Fraud and Abuse Act, which lawmakers changed when computer crimes had increased.

For those who had intentionally caused damage by transmitting viruses, the punishment could be a stiff prison term plus a fine.

Let's Practice!

Let's discuss computer crime.

Instructions: Find the words in the wordsearch below.

1. invade
2. undesirable
3. detect
4. hijack
5. century
6. stiff
7. fine
8. successive
9. generation

C	L	D	P	P	R	S	A	I	Q	X	Q	Q	J	F
T	Q	E	T	M	I	W	Q	D	C	C	Q	W	U	U
Z	C	G	T	U	E	O	V	H	R	H	E	K	G	N
R	H	E	X	L	A	L	N	B	T	I	S	C	V	D
V	E	N	N	T	X	L	M	V	D	J	I	M	R	E
E	Q	E	H	T	W	E	E	A	O	A	U	H	G	S
L	D	R	J	N	U	D	E	T	E	C	T	C	A	I

F	X	M	S	U	C	C	E	S	S	I	V	E	V	G

Let's Practice!

Computer viruses are bad!

Instructions: Complete the statements with a sentence from the box.

Word Bank

viruses roaming the internet had affected / the government hadn't taken / people had saved on a hard drive / for those who have intentionally caused damaged

1. They can erase all the files that _____.
2. One survey found _____ 98% of North American businesses.
3. _____ by transmitting viruses, the punishment could be a stiff prison term plus a fine.
4. _____ computer virus crimes seriously until now.

Extension Activity

Research a computer virus.

Instructions: Complete the following steps. Fill in the Self-Assessment.

- Use the Internet to research a recent computer virus that affected a lot of people.
- Summarize the information in your own words.
- Write a paragraph of 100-150 words.
- Tell a partner what you learned.

Self-Assessment

Yes

No

I talk about rules and regulations.

☐ ☐

I talk about crime and punishment.

☐ ☐

I talk about things I had done or things that had happened.

☐ ☐

Target Words

- **to invade** (verb): to enter a location without permission
e.g. A computer virus is a computer program that invades a computer and often causes unwanted things to happen.
- **undesirable** (adjective): unwanted
e.g. A computer virus is extremely undesirable.
- **successive** (adjective): following one another
e.g. Each successive generation of computer viruses is getting harder to destroy.
- **to detect** (verb): to find
e.g. Computer viruses are getting harder and harder to detect.
- **to hijack** (verb): to take control of something by force
e.g. Viruses can hijack your computer so it can be used for illegal purposes.
- **century** (noun): a period of one hundred years
e.g. Computer viruses are considered to be one of the major problems in our century.
- **intentionally** (adverb): purposefully
e.g. For those who had intentionally caused damage by transmitting viruses, the punishment is very serious.
- **stiff** (adjective): severe or strong
e.g. There are stiff punishments for people who create computer viruses.
- **fine** (noun): an amount of money to pay as punishment
e.g. The punishment could be a stiff prison term plus a fine.

Learning Points

The Simple Present Passive

You use an active structure when you want the 'doer' of the action to be the subject.
You use a passive structure when you want the 'receiver' of the action to be the subject.

Active sentence = People (subject) **consider** murder (object) to be the most serious crime.

Passive sentence = Murder (subject) is **considered** to be the most serious crime (by people).

It is not necessary to mention the object in a passive sentence.

You make the passive form of a verb by using tenses of the be verb followed by the past participle.

The Simple Present passive form is:

am/are/is + past participle

For example:

*English is **spoken** in the United States.*

Examples:

- *Computer viruses are considered to be one of the major problems in our century.*
- *Most of these businesses are linked to the Internet.*
- *Suspects accused of computer crimes are investigated and put on trial.*

Learning Points

The Past Perfect Tense

You use the Past Perfect tense to identify and talk about an 'earlier past'.

When you are talking about a past event, you can refer to something that happened at an earlier time to that past event by using the Past Perfect tense.

The structure of the Past Perfect is:

Subject + had + past participle

*When I arrived at the party, Vanessa **had** already **gone** home.*

Which event happened *first*? Vanessa went home.

Which event happened *later*? I arrived at the party.

You use the Past Perfect tense (not Simple Past) when you want to talk about how long something had continued **up to a past moment**.

*Until recently, detectives **had used** a limited number of tools to help them solve crimes.*

Detectives used a limited number of tools from the past until recently.

Examples:

- *They can erase all the files that people had saved on a hard drive, or make files useless by changing them.*
- *One survey found viruses roaming the Internet had infected 98% of North American businesses.*
- *For those who had intentionally caused damage by transmitting viruses, the punishment could be a stiff prison term plus a fine.*
